Career Objective

Aspiring Software Engineer and AI Developer with strong expertise in Full Stack MERN development, Generative AI, and intelligent agent-based systems. Experienced in architecting and deploying end-to-end web applications, AI-powered platforms, and cloud-native solutions using React.js, Node.js, Express.js, MongoDB, JavaScript, Python, REST APIs, and modern development tools. Demonstrated ability to transform innovative ideas into production-ready applications through multiple hackathons, real-world projects, and continuous learning. Passionate about solving complex problems with Artificial Intelligence, Agentic AI, and scalable software engineering while contributing to high-impact technology products in fast-paced, innovation-driven organizations.

Education

- **Rural Engineering College, Hulkoti** 2023 – 2027
B.E. in Computer Science and Engineering **CGPA: 7.8/10**
- **K.L.E Society's Jagadguru Tontadarya College, Gadag** 2022 – 2023
Science (PCMB) **percentage: 70.00**
- **Royal English Medium High School, Gadag** July 2021
SSLC **percentage: 85.12**

Skills

- **Languages:** Python, Java (Basic), JavaScript, TypeScript, C
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MongoDB Atlas, MySQL
- **AI & ML:** Generative AI, AI Agents, Machine Learning, Prompt Engineering
- **Tools:** Git, GitHub, VS Code, Postman
- **Deployment:** Vercel, Render
- **Core Subjects:** DBMS, Operating Systems, Computer Networks

Projects

- **Food Order Easy – Multi-Vendor Food Ordering Platform** React.js, Node.js, Express.js, MongoDB
 - Developed a full-stack multi-vendor food ordering platform with Role-Based Access Control (RBAC) for Super Admin, Restaurant Owner, and Customer roles
 - Implemented a restaurant verification and approval workflow, enabling only approved restaurant owners to manage menus.
 - Built features including JWT, shopping cart, order management, and COD & online payment integration.
 - Designed RESTful APIs with MongoDB for secure management of users, restaurants, menus, and orders.**GitHub:** [food-order-easy](#) **Live:** [Demo](#)
- **Accident and Crime Report App** Next.js, TypeScript, NeonDB, Gemini-AI, Mapbox
 - Developed an AI-powered crime reporting system for reporting emergency and non-emergency incidents.
 - Integrated AI image analysis to automatically generate incident titles and descriptions from uploaded images.
 - Implemented geolocation, unique tracking IDs, and real-time incident status tracking.
 - Built an Admin Dashboard for incident verification, case management, and report monitoring.**GitHub:** [crime_report_app](#) **Live:** [Demo](#)
- **CertForge AI – Enterprise Certification Intelligence Platform** Python, FastAPI, LangChain, LangGraph, Sk-learn
 - Developed an AI-powered workforce intelligence platform using Machine Learning and multi-agent AI to predict certification readiness.
 - Built Foundry IQ, Work IQ, and Fabric IQ for skill-gap analysis, workforce analytics, and certification forecasting.
 - Implemented RBAC, JWT authentication, WebSockets, and interactive enterprise dashboards.
 - Designed scalable RESTful APIs using FastAPI, MongoDB, LangChain, LangGraph, and Scikit-learn for AI-driven automation.**GitHub:** [CertForge-AI](#) **Live:** [Demo](#)
- **Global Weather Forecasting Platform** Java JDK 17, SpringBoot, MongoDB, Caffeine Cache, WeatherAPI
 - Developed a full-stack weather forecasting platform with real-time weather, AQI, 24-hour/7-day forecasts, and global location support.
 - Integrated OpenWeatherMap APIs, JWT, WebSockets, and interactive maps for real-time weather intelligence.

- **Smart Travel Assistant – AI-Powered Tourism Platform** *React.js, Node.js, MongoDB, Open-Meteo API, Leaflet*
 - Developed a full-stack AI-powered travel assistant that generates personalized itineraries based on user preferences, budget, and interests.
 - Integrated real-time weather, local events, interactive maps, and crowd intelligence using external APIs for enhanced travel planning.
 - Implemented JWT authentication, multilingual AI assistance, and sustainability-based travel recommendations.
 - Built scalable RESTful APIs with Node.js, Express.js, and MongoDB, delivering a responsive user experience with React and TypeScript.

GitHub: Tourism and Travel Tech

Live: Demo

Work Experience

- Pinnacle Labs | Virtual Internship

Nov 2025 - Dec 2025 (4 Weeks)
- Java Development Intern

- Developed Java applications using Core Java and Object-Oriented Programming (OOP) principles.
 - Built Quiz Game, Currency Converter, and Weather Forecast applications.
 - Implemented API integration, exception handling, and debugging to enhance application functionality.
 - Strengthened skills in Java, problem-solving, software development, and clean coding through hands-on projects.
- Technologies Used
 - Java, Core Java, OOP, SpringBoot, Maven, REST API Integration, Git, GitHub

Hackathons

- **Xactitude | 24-Hour National Level Hackathon, Kristu Jayanti Deemed to be University** *2nd Place | Feb 2026*
 - **Achievement:** Secured 2nd Place among the Top 9 Finalists, progressing through the Top 15 shortlisted teams in a 24-hour national-level hackathon
 - **Technologies:** React.js, Node.js, Express.js, MongoDB, TypeScript, Tailwind CSS, REST APIs, AI Integration..
 - **Contribution:** Frontend & Core Development | API Integration | AI & Database Handling | UI/UX Design | User-friendly Experience
- **OpenEnv 2026 Grand Finale – National AI Hackathon** *Finalist | Meta × Hugging Face × PyTorch*
 - Advanced to the Grand Finale as one of the Top 800 teams selected from 31,000+ registrations across India.
 - Designed and developed an AI-driven solution exploring Reinforcement Learning for solving real-world challenges in a collaborative team environment.
 - **Tech:** Python, Reinforcement Learning, LLM's, PyTorch, Hugging Face, AI/ML, Git, GitHub.
- **AROGYA MANTHAN 2K26 – 24-Hour National Healthcare Hackathon** *Consolation Prize | July 2026*
 - Secured the **Consolation Prize (Top 5 Finish)** among **68 participating teams**, advancing to the **Top 15 Finalists** in a 24-hour national healthcare hackathon.
 - Collaborated in a 5-member team to design and develop an innovative technology-driven solution addressing real-world healthcare challenges.
 - **Tech:** React.js, Node.js, Express.js, MongoDB, JavaScript, REST APIs, Git, GitHub.

Certifications

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** *October 17, 2025*
Oracle University
- **5-Day AI Agents Intensive Course with Google** *June 15 - 19, 2026*
Kaggle | Google
- **Programming in Python with AI** *December 11, 2025*
internshala
- **Generative AI Course: Build Innovative Apps and Websites** *May 08, 2026*
internshala
- **Build with AI Agent Builder Camp** *June 2026*
GeeksforGeeks × Google for Developers

Coding Profiles

- **LeetCode** *leetcode.com/mahammadaftab*
- **HackerRank** *hackerrank.com/MahammadAftab*

Achievements

- Secured **1081st Place** globally in the **HackerRank Orchestrate May 2026** AI Challenge for designing and submitting an AI Agent.
